

This form should be completed by a Consultant Histopathologist - Please do not complete for recurrent disease

Patient Name: D.O.B Sex: Hospital No:
 NHS No: Date of Opn: Surgeon: Specimen No:

1. Gross Description

Maximum length of specimen mm Pinned Not pinned
 Length of oesophagus mm Length of stomach (maximum) mm
 Width of tumour mm Length of tumour mm
 Tumour edge to nearest distal margin mm Macroscopic type of tumour: Polypoid Other
 Tumour edge to nearest proximal margin mm

2. Histology (Type)

Squamous Adenocarcinoma Other (Please Specify
 Differentiation by predominant area: Well moderately poorly differentiated

Depth of invasion

Tis high grade dysplasia T3 invasion beyond muscularis propria
 T1 invasion of lamina propria/ submucosa T4 invasion of adjacent structures
 T2 invasion of muscularis propria Serosal involvement: Yes No

Proximal margin

Normal Barrett's Dysplasia Carcinoma

Circumferential margin

Involvement (>1mm): Yes No
 (If no - distance of carcinoma to nearest circumferential margin) mm

Distal margin features

Normal Dysplasia Carcinoma

Other features

Vascular invasion Yes No Barrett's metaplasia Adjacent to tumour Yes No

Lymph Nodes

Number examined Number positive (N0 if no nodes positive, otherwise N1)

Distant metastases

Coeliac axis node positive (M1a if lower thoracic carcinoma, otherwise M1b) Yes No
 Cervical node positive (M1a if upper thoracic carcinoma, otherwise M1b) Yes No
 Other distant metastasis (M1b) Yes No

3. Pathological Staging

Complete resection at all margins Yes No
 TNM Stage pT pN pM
