

**This form should be completed by a Consultant Histopathologist - Please do not complete for recurrent disease**

Patient Name:  D.O.B  Sex:  Hospital No:   
 NHS No:  Date of Opn:  Surgeon:  Specimen No:

**1. Specimen Details**

**Type of Specimen**

Biopsy

Excision  → local  wide local  compartmentomy   
 radical excision  amputation

**Site of Tumour**

Skin/Subcutis  → (Location)

Deep soft tissue (incl, retroperitoneum)  → (Location)

Visceral  → (Please Specify)

Other  → (Please Specify)

**2. Macroscopic Details**

**Maximum Dimension**  mm

**Distance to nearest margin**  mm

**Is this a fascial plane?** Yes  No

**Necrosis** Nil  <50%  >50%

**3. Microscopic Details**

**Type of Tumour**

**Distance to nearest margin**  mm

**Tumour Extent** Intracompartmental  Extracompartmental

**Mitotic Count (per 10hpf)** 0-9  10-19  >=20

**Necrosis** Nil  <50%  >50%

**Differentiation** like adult tissue  certain histo type  undifferentiated

**Grade** 1  2  3  (see reverse)

Name of Pathologist:  SNOMED Code: T:  M:  Date:

## SOFT TISSUE SARCOMAS - TROJANI GRADING SYSTEM

MITOSES:                    Score 1: 0-9/10 hpf  
                                     2: 10-19/10 hpf  
                                     3: 20+/10 hpf

NECROSIS:                 Score 0: no necrosis  
                                     1: 1-50% necrosis  
                                     2: 50% + necrosis

DIFFERENTIATION:        Score 1: Like adult tissue  
                                     2: Certain histological type  
                                     3: Embryonal or undifferentiated

### SCORE TOTAL

GRADE 1    :    2 OR 3  
GRADE 2    :    4 OR 5  
GRADE 3    :    6,7,8
