

Townsend Material Deprivation Index Scores by Ward

Section 1 - Calculating Townsend Material Deprivation Index* by 1991 ward for the NYCRIS area

The Townsend Material Deprivation Index is made up of the following 4 Census 1991 variables:

Unemployment – unemployed residents over 16 years as a % of all economically active residents aged over 16.

Overcrowding – households with 1 and over persons per room as a % of all households.

Non car ownership – households with no car as a % all households.

Non home ownership – households not owning their own home as a % of all households.

The percentages produced for unemployment and overcrowding are transformed using the natural log function and each of the variables are then standardised using Z scores (observed value – mean value divided by standard deviation) using the mean and standard deviation for the whole area. The resulting z scores are added together to produce the Townsend Index score.

Generating NYCRIS ward level scores.

There are 1,150 1991 based wards within the NYCRIS area.

Census information for the NYCRIS area used to calculate the 4 variables above were obtained from MIMAS.

Values for unemployment and overcrowding were transformed by applying the natural log function (i.e. $\ln(\text{value})$).

Standardised z scores were calculated by applying the mean and standard deviation %'s, for the whole NYCRIS area, for each of the variables, to each of the wards. The 4 z scores obtained were added together to obtain the Townsend Material Deprivation Index score for each ward.

The resulting Ward scores range from -8.33 to 9.88, with the mean score equal to 0. Positive scores indicate greater levels of deprivation.

* Townsend P, Phillimore P, Beattie A (1988) Health and Deprivation: inequality and the North.

Section 2 - Townsend Material Deprivation Index Scores by Ward. Sorted by Deprivation Quintile and Ward name

District	Ward name	Townsend score	Deprivation Quintile
Middlesbrough	Acklam	- 4.23	1
Craven	Aire Valley	- 4.14	1
Leeds	Aireborough	- 2.40	1
